

**IN THE SPECIFICATION:**

**Please replace paragraph 3 at page 41 continuing onto page 42, with the following rewritten paragraph:**

In this example, if an arbitrary thumbnail concerning the still image by the first projector 2 is selected using the marking "Mark" key K7, the motion image displayed above the display portion 76 is also brought into sync with it to shift to time when the thumbnail 74 is displayed and is normally reproduced starting from the time. Herein, the selected thumbnail 74 is set to Picture 1 so that it can be enlarged and displayed in the still image reproducing screen 60b. Thus, in spite of the contents of Picture 1 displayed on the still image reproducing screen 60b, the ones of the thumbnails 64 74 thus mark-displayed are replaced. In this example, in the electronic conference, marked conference contents are enlarged and displayed.
